Young ladies and Misses, advice to 122, 90, 27, 58

MICHIGAN FARMER.—Mr. Isham, editor of this excellent agricultural journal, has just returned from a tour in Europe, which he has been prosecuting since the close of the World's Fair. He will hereafter give his undivided attention to the pages of the Farmer; and bringing to his aid the experience of his travels, will add much to its former interest.—*Washtenaw Whig.*

☞ Those who are at a loss for the form of a subscription paper, may copy the prospectus next page. The introduction intended for it was inserted by mistake on page 382.

☞ The splendid engraving of the great Crystal Palace now erecting in New York, which we send out with our present number, will doubtless be very acceptable to our readers.

Those who wish can have sample copies of the Dec. No.

NOTICES OF THE FARMER.

MICAIGAN FARMER.—We notice that the editor of the Michigan Farmer, after a long absence and an extended tour in Europe has again become firmly seated on the tripod, and is making renewed efforts to render his paper, the best agricultural Journal of the west. Mr. Isham's letters from Europe during the past season, have formed an attractive feature of his paper, and he has gathered material sufficient to enable him to maintain its interest in this respect for another year at least.—*Gr. Rapids Inq.*

THE MICHIGAN FARMER.—A new volume of this excellent publication will commence on the 1st of January.—This work, for the coming year, will possess advantages and attractions far beyond any it has previously enjoyed. Its editor has recently returned from Europe, where he has travelled extensively and collected a vast amount of information, which he intends to embody in the pages of the "Farmer" during the coming year. The reading matter has recently been nearly doubled by the substitution of fine type, and this without any increase of price. This paper, now, is the most profitable agricultural journal the Western farmer can take. R. S. Gage, Esq., of this village, is agent.—*Kal. Gazette.*

THE MICHIGAN FARMER.—This truly valuable agricultural journal is doing good service for the farmers of Michigan. Mr. Isham, the editor, is a gentleman distinguished for ability as a sound and practical writer, and having recently traveled for some eighteen months in all the principal countries of Europe, he is doubly qualified to furnish the readers of his paper with agricultural information, both interesting and useful; and that he will do so, we have the surest guaranty in the zeal he has heretofore exhibited in behalf of his useful journal and readers. —*Monroe Com.*

THE MICHIGAN FARMER.—We have received just copies enough of this valuable paper to remind us of its existence and its merits. It is now improved by being printed on finer type, and in an enlarged form. Mr. Isham, the editor, has been, for the last eighteen months, on a visit through the different kingdoms of Europe, and his

letters and notes, (which are to be continued,) published during that time in the Farmer, have been characterized with deep interest.—*Oakland Gaz.*

MICHIGAN FARMER.—The November number of this excellent journal, has been laid upon our table by its talented editor. It is filled with choice original and selected matter and presents a well digested compendium of agriculture. The many valuable facts gathered by the editor in his recent European tour, are being elucidated for the benefit of our Michigan farmers, many of which are of incalculable benefit.—*American Citizen.*

THE MICHIGAN FARMER.—This valuable journal for farmers, since the return of Mr. Isham from his foreign tour, will be more interesting than ever. The Farmer has been increasing in popular favor for several years, and now bids fair to be a general favorite, as it should be, of the entire agricultural portion of the citizens of the State. To use the language of the Detroit Tribune:—*Marshall Statesman.*

"No Agricultural Editor in the United States has devoted as much, or more time, and made greater pecuniary sacrifices, in travels through the United States, and a year and a half spent in England, Ireland, France, Germany, and other European countries, in making extended personal observations and examinations, and obtaining desirable and valuable information for the improvement of the agricultural interests of Michigan, than Mr. Isham."

MICHIGAN FARMER.—This valuable periodical enters upon a new volume on the first of January. However valuable the agricultural publications of other States may be, this one which is published in our midst, by one acquainted with the soil, seasons and circumstances of our State, and which furnishes to the farmers of Michigan so convenient a means of comparing notes and experiences, is almost indispensible.—*Adrian Watchtower.*

MICHIGAN FARMER.—Mr. Isham, the editor, has just returned from his eighteen months' tour in the old world. He has the ability to make the Michigan Farmer the best agricultural paper in the country. It is the best on our exchange list.—*Galesburgh (Illinois) News-Letter.*

THE MICHIGAN FARMER.—This excellent Agricultural journal and friend of the Farmer comes to us much improved and enlarged by being printed in fine type. It is ably conducted; Mr. Isham, the editor, has recently returned from Europe where he has spent his time profitably to himself and readers, as his excellent letters while there will testify. We heartily commend this paper to our Farmers of Kalamazoo County.—*Kal. Telegraph.*

THE MICHIGAN FARMER.—This publication is wining golden opinions in the West, and confessedly takes rank with the best agricultural journals of our country.—*Detroit Daily Advertiser.*

MICHIGAN FARMER.—That excellent agricultural journal the Michigan Farmer, is to enter upon a new volume with the in-coming of the new year; and we think that we can do our readers no better service than by calling their attention to the fact, in order that they may renew their subscriptions, or begin them if, unfortunately, they are not already subscribers. During the year, the reading matter of the Farmer has been very much increased by enmalling the type upon which it is printed. In the coming volume, the editor, Warren Isham, who has just returned from a tour in Europe, will continue his very interesting notes from foreign countries. Every farmer in our State should be a sudscriber.—*Cold Water Sentinel.*

MICHIGAN FARMER.—We are pleased to learn that Mr. ISHAM, the popular and enterprising Editor and Publisher of this valuable Agricultural Journal anticipates commencing the new volume, in January next, with a subscription list increased to Ten Thousand Copies. No Agricultural Editor in the United States has devoted as much, or more time, and made greater pecuniary sacrifices, in travels through the United States, and a year and a half spent in England, Ireland, France, Germany, and other European countries, in making extended personal observations and examinations, and obtaining desirable and valuable information for the improvement of the agricultural interests of Michigan, than Mr. Isham. It is to be hoped that the Farmers of our State will reciprocate the interest he has thus taken in their behalf, by giving a generous and increased circulation to his sterling paper. —*Detroit Daily Tribune.*

MICHIGAN FARMER.—We are pleased to see that this valuable and interesting agricultural paper under the supervision of Warren Isham, is receiving a very extensive patronage from the farmers of our Peninsular State.

There is perhaps no more ably conducted paper of the kind in our country, and we are heartily glad to be able to chronicle its success. The Farmer is now published at one dollar a year, in advance, and in clubs, at seventy-five cents. Mr. Isham is also offering heavy premiums for clubs for the new volume, commencing in January. A beautiful engraving of the New York Crystal Palace, is to be sent to each subscriber. Post Masters are requested to act as agents.—*Adrian Expositor.*

WARREN ISHAM, ESQ.—We notice the return of Warren Isham, Esq., the talented editor of the Michigan Farmer, from an eighteen months tour through the different countries of Europe, where he has had every opportunity for extensive observation. He will meet a warm reception from the people of the Peninsular State.—*Daily Free Press.*

MICHIGAN FARMER.—As the time approaches for forming clubs and subscribing for agricultural papers for the coming year, it is highly desirable that every farmer sho'd encourage his own state agricultural periodical. The communications that monthly appear in it from different individuals in various parts of the State, impart a home interest and variety, that makes the Farmer always interesting, aside from the valuable and able editorial articles, always to be found in it. Mr. Isham has recently returned from his travels in the old world, with renovated health and energies, having added largely to his knowledge and experience in agricultural matters. He promises to make the Farmer, for the next year, the best agricultural paper published in the United States. C. P. Dibble is receiving subscriptions for the Farmer in the village. Let every one, no matter what his occupation is, subscribe for it, he will get matter enough in each number to be worth the price of the paper for a year.—*Marshall Expounder.*

MICHIGAN FARMER,

FOR 1853.

The eleventh volume of the Michigan Farmer will commence on the first of January next, under more favorable auspices than any heretofore.

The Editor having spent the past eighteen months in the different countries of the old world, returns to his task with advantages which no agricultural editor in our country enjoys.

His "Notes" from the various countries through which he travelled, relating to their agriculture, and other interesting topics, will form a prominent feature in the whole of the next volume. He has a rich treasure of most interesting facts on which to draw.

To all new subscribers will be sent a splendid engraving of the great crystal palace in New York.

The quantity of matter in the Farmer has been almost doubled by the substitution of fine type, without any increase of price. No agricultural paper is cheaper now.

The character of the Farmer is now established, the best judges pronouncing it equal to the best in the land, and no one is afraid of losing his money by paying in advance.
